### Lenguajes y Autómatas I

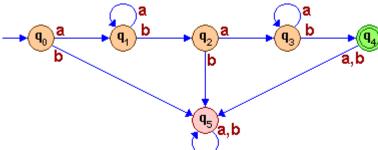

#### RESPUESTA DE LA TAREA 8

1. Para los siguientes ejercicios, construya el diagrama de transición del **AFD** que acepta a cada uno de los lenguajes sobre el alfabeto  $\Sigma = \{ a, b \}$ , descritos por la expresión regular dada:

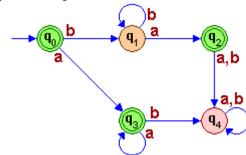

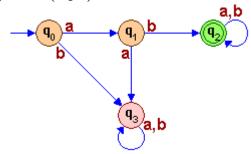

b)  $L = \mathbf{a}^{+}\mathbf{b}\mathbf{a}^{+}\mathbf{b}$ 

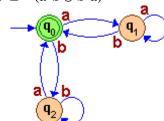

c)  $L = \mathbf{b}^{+}\mathbf{a} \cup \mathbf{a}^{*}$ 

d)  $L = ab(a \cup b)^*$ 

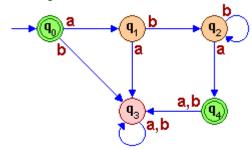

e)  $L = (\mathbf{a}^+ \mathbf{b} \cup \mathbf{b}^+ \mathbf{a})^*$ 

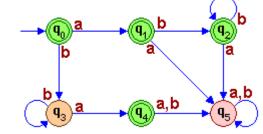

## Lenguajes y Autómatas I

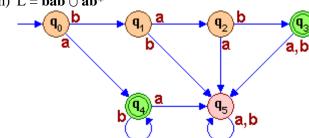

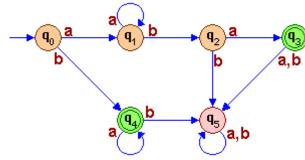

#### g) $L = \epsilon \cup ab^+ \cup b^*a$

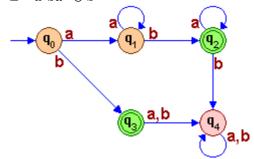

#### h) $L = \mathbf{bab} \cup \mathbf{ab}^*$

#### i) $L = \mathbf{a}^{+}\mathbf{ba} \cup \mathbf{ba}^{*}$

### $j) \quad L = \mathbf{a}^+ \mathbf{b} \mathbf{a}^* \cup \mathbf{b}$
